> Why Has a Snow Crystal Six Sides? What magic is there in the rule of six that compels the snow-flake to conform so rigidly to its laws? Here is a gembestrewn realm of nature, possessing the charm of mystery of the unknown, sure richly to reward the investigator. Much wonder has been excited, because

the snow crystals exhibit such a bewildering diversity and beauty. They form within a very thin gaseous solvent the air, and this allows the molecules of water an unexampled freedom of mo tion and adjustment while arranging themselves in crystal form. The fact doubtless largely explains why the crys tals of snow far exceed other orystals in complexity and symmetry. Snow crystale, like all crystals of water, develop under the hexagonal system and invari aldy divide into six. Nothing absoluted certain is known as to way they grow thus, except as it is assumed the number and arrangement of the attractive and epelient poles possessed by the mole culra of water impose this habit of growth upon them. This sividing into six is necessarily discussed and best explained in somewhat technical sounding terms. We may assume each water particle or melecule possesses two oppo-eits primary poles, positive and negative, corresponding in direction with the main tabular axis of the crystals, and in addition three or six equi-distant secondary poles, arranged around what may be called the equatorial diameters of the molecules. Water, being a dia-magnetic substance and susceptible to polar repulsion, presumably has a tendency to

Realize?

That despondency in women is a mental condition often traceable to some distinctly female ill!

Women who are well do not have the blues, neither are they irritable and restless. Derangement of the female organism breeds all kinds of miserable feelings such as backache, headache, and bearing-down feelings. Try Lydia E. Pinkham's Vegetable Compound. There is no doubt that it has made many remarkable cures of female ills after all other means had failed. There is hardly a day that some woman does not write us that this simple old medicine, made only of roots and herbs, has cured her of a severe

Here are two such letters - read them - they are genuine and reliable.

Platea, Pa.—"When I wrote to you first I was troubled with backache and was so nervous that I would cry at the least noise, it would startle me so. I began to take Lydia E. Pinkham's remedies, and I don't have any more crying spells. I sleep sound and my catarrh is better, thanks to your advice. I will recommend your medicines to all sufferers."—Mrs. Marrialstend, Platea, Pa., Box 98.

Walcott, N. Dakota—"I had inflammation which caused pains in my sides, and my back ached all the time. I was so blue that I felt like crying if any one even said 'How poorly you look to-day.' I wrote to you for advice and got it at once. I started to take Lydia E. Pinkham's Vegetable Compound, Blood Purifier and Liver Pills, and I began to feel better and looked better before I finished the fourth bottle of medicine."—Mrs. Amelia Dahl, Walcott, N. Dakota.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit. Mrs. Pinkham invites all siek women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

fillman, wishing to know if he intended abel Maxey, one of his characters, for a good or a bad man. Mr. Sunderland replied that, although Maxey had poisoned three different people.
